

ARYAN VERMA

Backend Developer

Bareilly, Uttar Pradesh, India | aryan.verma@example.com | github.com/aryanverma11014 | linkedin.com/in/aryan-verma | Portfolio

PROFESSIONAL SUMMARY

Aspiring Backend Developer with hands-on experience building REST APIs, authentication systems, and database-driven applications using Node.js, TypeScript, Express.js, MongoDB, and SQL. Passionate about designing scalable, production-ready backend architectures. Actively learning system design, Redis, and Docker to grow into a backend engineer role.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Middleware Design

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code

Currently Learning: Redis, Docker, System Design, Backend Architecture Patterns

PROJECTS

Task Manager API 2025 – 2026

Node.js · TypeScript · Express.js · MongoDB · JWT

- Built a production-ready REST API with JWT-based authentication, role-based access control, and full CRUD operations.
- Designed middleware layers for request authentication, input validation, and structured MongoDB data models.

Authentication System 2025 – 2026

Node.js · TypeScript · JWT · MongoDB

- Developed a complete auth service with access tokens, refresh tokens, and password hashing using bcrypt.
- Implemented secure route authorization and token rotation strategies for production-ready environments.

Expense Tracker API 2025 – 2026

Node.js · Express.js · MongoDB

- Built a backend API for managing expenses with category tagging, analytics endpoints, and secure user accounts.
- Designed RESTful routes following clean API principles with proper status codes and error handling.

Notes API 2025

TypeScript · Express.js

- Created a lightweight REST API for note management focused on clean code patterns and type safety in TypeScript.
- Used as a learning project to practice backend development fundamentals and proper TypeScript integration.

LEARNING & DEVELOPMENT

Self-Directed Backend Engineering Path

2024 – Present

- Progressed through a structured path: JavaScript → TypeScript → Node.js → Express.js → MongoDB/SQL → System Design.
- Currently studying Redis, Docker, caching strategies, and distributed system design for production environments.

EDUCATION

B.Tech – Computer Science and Engineering

2022 – 2026

SRMS College of Engineering Technology and Research, Bareilly, India

- CGPA: 7.5 / 10
